ACCESSORY KITS and INSTALLATION KITS STAR for remote mounting

When should you opt for remote mounting of a lubrication system:

- Is it difficult or dangerous to reach the lubrication point **during plant operation**?
- Is the lubrication point subject to **strong vibrations** or **high temperatures** which may impair or damage the lubrication system?
- Is **access permission** required to reach lubrication points in secured areas or at great heights?
- Is the lubrication point exposed to **large quantities of water, pumped media, media** from the **manufacturing process** or impact from **solids**?

If you answer yes to one of the questions, we recommend that you use indirect / remote mounting.

Benefits of the ACCESSORY KITS and INSTALLATION KITS STAR

WORKPLACE SAFETY

- Remote mounting reduces the risk of accidents by up to 90 %
- Remote mounting reduces the time spent in hard-to-access dangerous areas

COSTS

- Economical best solution with cost advantage compared to individual purchase
- All parts from one source → less administrative effort

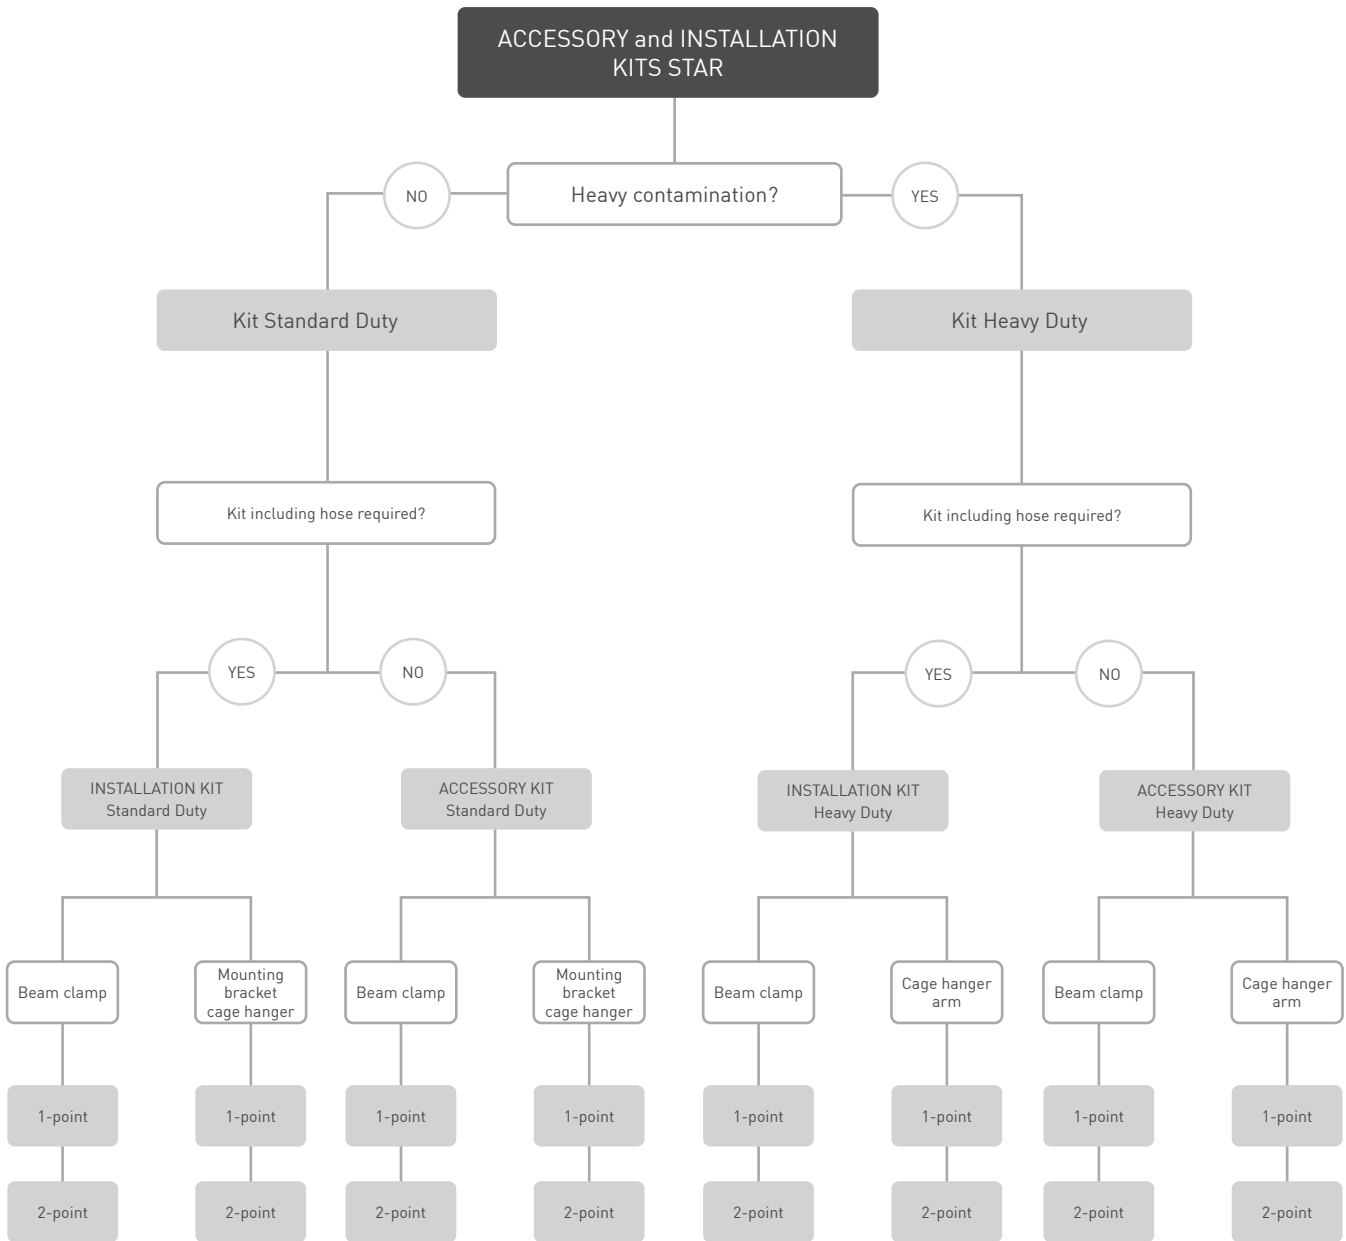

RELIABILITY

- All kits were developed based on many years of experience to meet the challenges of all common applications
- Particularly robust accessory parts to ensure long service life

Selecting the right kit

perma has developed a variety of kits for remote mounting. We recommend to use the decision tree below to determine the most suitable kit for your application:

Kit Standard Duty
Kit Heavy Duty

Standard ambient conditions
Extrem ambient conditions

INSTALLATION KIT
ACCESSORY KIT

Hoses included
Hoses not included

Beam clamp
Mounting bracket cage hanger

Mounting of the kit by means of a beam clamp
Mounting of the kit to a safety guard

ACCESSORY KITS and INSTALLATION KITS STAR

Standard and Heavy Duty

STANDARD DUTY KIT

These kits are very versatile and can be used in areas with normal ambient conditions.

HEAVY DUTY KIT

Heavy Duty kits have been specifically designed for use in operational areas with harsh ambient conditions which are subject to regular wash down and water impact, such as the conditions found in coal handling preparation plants.

INSTALLATION KITS

INSTALLATION KITS contain all necessary parts for the complete mounting of the lubrication system to the lubrication point: mounting bracket with mounting support, support flange, hose connectors, reducers and Heavy Duty hose.

ACCESSORY KITS

The only difference between the ACCESSORY KITS and the INSTALLATION KITS is that no hose is included.

BEAM CLAMP

MOUNTING BRACKET CAGE HANGER

Kits STAR Standard Duty

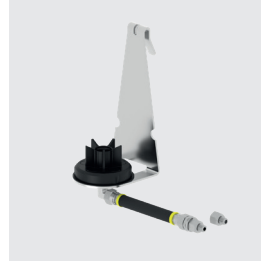

Solutions for normal ambient conditions

INSTALLATION KITS STAR (with hose) Standard Duty

1-point 65 mm
beam clamp mount
incl. 3 m hose

Art. No. 116961

1-point
cage hanger mount
incl. 3 m hose

Art. No. 116962

2-point 65 mm
beam clamp mount
incl. 5 m hose

Art. No. 116963

2-point
cage hanger mount
incl. 5 m hose

Art. No. 116964

ACCESSORY KITS STAR (without hose) Standard Duty

1-point 65 mm
beam clamp mount
without hose

Art. No. 116951

1-point
cage hanger mount
without hose

Art. No. 116952

2-point 65 mm
beam clamp mount
without hose

Art. No. 116953

2-point
cage hanger mount
without hose

Art. No. 116954

Kits STAR Heavy Duty

Solutions for extreme ambient conditions

INSTALLATION KITS STAR (with hose) Heavy Duty

1-point 65 mm
beam clamp mount
incl. 3 m hose

Art. No. 116965

1-point
cage hanger mount
incl. 3 m hose

Art. No. 116966

2-point 65 mm
beam clamp mount
incl. 5 m hose

Art. No. 116967

2-point
cage hanger mount
incl. 5 m hose

Art. No. 116968

ACCESSORY KITS STAR (without hose) Heavy Duty

1-point 65 mm
beam clamp mount
without hose

Art. No. 116955

1-point
cage hanger mount
without hose

Art. No. 116956

2-point 65 mm
beam clamp mount
without hose

Art. No. 116957

2-point cage
hanger mount
without hose

Art. No. 116958
