perma FITTINGS CASES

Part numbers and case contents

Various fittings cases are available to provide a convenient and economical option for on-site spares. The themed cases include carefully selected reducing adaptors, extensions and elbows. The cases have a heavy duty plastic construction with an integrated water seal, removable compartments, impact resistant lid and heavy duty latches. If different combinations are required please contact your supply of perma products to investigate the supply of a customised option.

THE EXPERT IN LUBRICATION SOLUTIONS

WORKPLACE SAFETY

Reliable systems that reduce the interface between people and operating equipment are a key element to eliminating workplace accidents.

The perma STAR VARIO consists of a reusable electro-mechanical drive unit and a single-use lubricant cartridge. Because the lubricator is mechanically driven, the dispensing rate is independent of ambient temperature and back pressure[^].

Inspection of the perma STAR VARIO is made easy via the combination of the transparent lubricant cartridge, a flashing LED alert system and an LCD display screen which communicates the status of the lubricator to maintenance personnel.

[^]Total resistance to grease flow must be less than the pressure delivery capability of the lubricator

BEARING LIFE EXTENSION

Lubrication systems which deliver small volumes of lubricant at short intervals extend bearing life and deliver a reliability advantage.

CONTAMINATION PREVENTION

perma automatic lubrication systems provide a means to achieve a purge of clean grease through bearing seals to prevent entry of water, dirt and dust and in doing so extend bearing service life.
