

Product Change

perma PRO C and perma PRO C LINE with exchangeable support battery

PCN-No.:

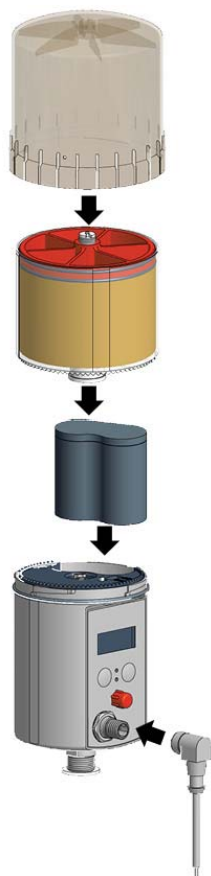

1907-01-00

Date:

2019-07-26

Details:

perma PRO C and PRO C LINE will soon be equipped with an exchangeable support battery. Battery PRO B (Art. No.106953) will be used as the support battery. The previously used integral support battery will no longer be used.

Support battery is not rechargeable.

Use battery until display shows "Lo"!

Use only original batteries from perma-tec!

© 2019/06 - Version: 1.0 - Art. No. 116914

The display shows "Lo" when the support battery is empty. This does not impact system function: Configuration does not change and there is no error signal to the PLC.

The currently used LC will empty despite the displayed „Lo“.

The support battery should be exchanged during the next LC exchange → no change of the setting → system starts with an initial run.

When the distributor MP-6 is connected, system will start with an initial run as soon as power is applied.

After the initial run, the system continues to operate with the previous setting.

Products affected:

perma PRO C Drive (Art. No. 106903),
 perma PRO C LINE Drive (Art. No. 106932),
 perma PRO C MP-6 basic system (Art. No. 106922 & Art. No. 106938)
 perma PRO C LINE basic system (Art. No. 106935 & Art. No. 106936)

Effective date:

Third quarter of 2019
